## PROFESSIONAL SUMMARY

Dedicated environmental professional with a broad background in environmental consulting. Successful in building and sustaining long-term business relationships with clients and regulators. Possess excellent problem-solving skills with an attention to detail. These skills have assisted clients in not just compliance but maintaining compliance.

## *WORK EXPERIENCE*

### **INDEPENDANT CONSULTANT/TRAINER**

**2006-Present**

Worked as an independent consultant in waste and water media.

- TCEQ approved training as a state approved trainer. Provided MSW A and B Operators with their initial training as well as renewal training.
- Provided compliance audits for solid waste clients to include conducting a privileged audit.
- Contracted with the University of Texas Arlington to conduct UST inspections to determine compliance with state and federal regulations.

### **TEXAS COMMISSION ON ENVIRONMENTAL QUALITY**

**1994-2006**

Provided regulatory guidance to industry and the general public in several sections of the Houston Field Office, Region 12.

- Field Investigator for Petroleum Storage Tank (PST). Duties included compliance investigations of facilities with Underground Storage Tanks (USTs).
- Field Investigator for Hazardous Waste Section. Duties included complaint and compliance investigations for generators, transporters, treatment and disposal facilities.
- Field Investigator for Municipal Waste Section. Duties included complaint and compliance investigations for all aspects of Landfill Facilities, Processing Facilities, Material Recovery Facilities and Medical Waste Facilities.

**FLORIDA DEPARTMENT OF ENVIRONMENTAL QUALITY**

**1992-1994**

Provided regulatory guidance with environmental clean-ups. This included the auditing of data for reimbursements for expenses associated with environmental clean-ups for state lead remediation activities at federal facilities.

**OIL AND GAS INDUSTRY**

**1974-1992**

Worked as a Petroleum Geologist for both major and independent oil and gas companies. Responsible for generating and reviewing oil and gas prospects as well as reviewed and audited producing properties and associated equipment for purchase.
